

Fantom Tweakbook

Artemiy Pavlov

Getting the most out of the Roland Fantom-S, Fantom-X,
Juno-G and SonicCell synthesizers

5th edition

Fantom Tweakbook

This book is intended for people who want to explore the deepest corners of their Fantom-S, Fantom-X and Juno-G synthesizers from Roland. It opens many invaluable sound design secrets in form of deep but easy-to-read, illustrated articles on synthesis, effects processing and sampling. Additionally provided are lots of example patches, templates, raw sample materials and audio demonstrations.

The Fantom Tweakbook covers an overwhelming amount of topics, including subtractive, additive and vector synthesis, ring modulation, analog sound replication, envelope, LFO and matrix modulation, using effect processors as synthesis blocks, sampling and re-sampling, advanced processing of internal and external sounds, using in conjunction with other gear and much beyond. Combined with featured dictionary and parameter map, it is a great knowledge resource for both newbie and hardcore Roland users.

About The Author

Artemiy Pavlov was born in 1981 in Kharkov, Ukraine, in a family of an electronics engineer and a math teacher, both of which were also musicians. He naturally paid a lot of interest in sound both as an art and as a physical phenomenon, and nowadays it's both his passion and profession. In the field of sound design and development, Artemiy worked with companies like Roland, Native Instruments and Spectrasonics, and created a number of successful products for his own Sinevibes, such as books, sound libraries and software plug-ins. He also is a PhD student at the Kharkov National University of Radioelectronics, doing research in the field of electromagnetism and artificial structures. Artemiy is married since 2001, with two daughters born 2004 and 2007.

Contents

Introduction	5
Everything Out Of Nothing	7
Unisonic	7
Wave arithmetics, part 1	8
Addi(c)tive synthesis	9
Delayed tones	10
Flange ensemble	11
Ring the bell	12
Low modulator	13
Lord of the ring (modulator)	13
What's that noise?	15
Wave buster	15
Syncopea	17
The steeper, the better	18
Count to 303	19
A different filter	20
Can you see a DC?	22
Selfish oscillation	23
Buenos notches	24
Stereotonic	25
Modulation Magic	26
Pitch envelope vs. TVF/TVA envelopes	26
Shaping envelope and LFO forms	26
Get clicky	27
Deeper pitch slides	28
Retro beatbox	29
Sequential world	31
Wave arithmetics, part 2	32
Controlled time stretching	34
Freeze, froze, frozen	35
Left plus right	36
Vectorize	37
LFO by LFO	38
Envelope'd LFO	39
Vari-filter	40
Velocity games, part 1	41
Velocity games, part 2	42
Monster FX	44

A fat recipe	44
Acid empire	44
Talking synth	45
Monster filter	46
Triple notch	48
Time machine	48
Moving shadows	49
Be shifted	50
True Lo-Fi	51
Infinity	52
Effected tail	52
Six voices	53
Tweak, Sample, Repeat	54
"Doctor, they are everywhere!"	55
Han Solo	55
D-tune	58
Feedback wizardry	58
Synthisphere	59
Antiverb	61
Partially processed	61
COSMic Synthesis	62
COSMic filter	62
LFO to MFX	64
Phase control	65
Retro Sci-Fi	66
Key gate	68
Recording Trick-o-logy	69
Rock your Fantom	69
Sound multiplication	70
External processing	70
External vocoding	71
Dictionary	73
Parameter Map	74
Acknowledgements	77
